1) Thesis Statement: Clear and focused thesis

Not Applicable	Beginning	Developing	Accomplished	Exemplary
A thesis is not necessary for this submission.	The thesis does not appear to be relevant, is not clearly defined, or lacks focus.	The thesis statement is present and clear. The focal point is not consistently maintained throughout the paper.	The thesis states the position, premise, or hypothesis, and is the focal point of the paper for the most part.	The thesis clearly and concisely states the position, premise, or hypothesis and is consistently the focal point throughout the paper.

Thesis statement target feedback:

Welcome :) Thank you for submitting your draft today. I'm happy to help you with your assignment. For this review, I focused on your cause and effect sections :) Let's dive in & talk about your thesis: "Community solar projects offer a promising solution to energy poverty in low-income urban areas by providing affordable clean energy, reducing electricity costs, and promoting environmental sustainability, and should be widely implemented with government support and community engagement." I think this thesis statement is like 95% of perfect! I recommend that you modify it slightly so that you make a direct appeal to your target audience (i.e. policymakers, activists, and community leaders). You end on "... [they] should be widely implemented with government support and community engagement". This is written in passive voice, where the subject of the sentence (community solar projects) does not do the action (to implement). Instead, the action (to implement) is done to the subject. I recommend revamping this sentence to make the audience your subject & provide information about what they should do. This makes it more pressing & impactful for them. For example & borrowing from my comment, instead of saying "Plan X solves world hunger and should be implemented by the UN." we

could say “The UN should implement Plan X to solve world hunger.” You can still cover all your great arguments, but you can tailor it to your target audience :) Other than that, I think your thesis is excellent! It summarizes your major points and provides the readers with an overview/roadmap of your argumentation. This is a core skill in academia! Best of luck!!

2) Developing Ideas: Well-developed and logical ideas

Beginning	Developing	Accomplished	Exemplary
Shows some thinking and reasoning but most ideas are underdeveloped.	Content indicates thinking and reasoning applied with original thought on a few ideas.	Content indicates original thinking and develops ideas with sufficient and firm evidence.	Content indicates synthesis of ideas, in-depth analysis and evidences original thought and support for the topic.

Developing ideas target feedback:

Overall, I think you have an amazing essay! Since you specifically asked for feedback on your causes & effects (c&e), I'll dwell on this for a bit. In reading, I divided your c&es into 3: community, cost, and sustainability. You have an opportunity to further refine C&E1 on community. Right now, it starts off with "Community solar projects provide affordable clean energy to low-income households." You then talk about how costs can be defrayed across the community, making previously inaccessible technologies like solar affordable. You then say "Renewable energy reduces dependence on traditional, more expensive energy sources." --> I think this point on costs fits more closely under C&E2 on lower costs. For point #3 in C&E1, I recommend thinking about what other benefits exist in bundling costs & risks as a community. Does this insulate the community from price shocks or natural disasters? Does it provide impoverished folks with additional income or protection from market fluctuations? I think there are lots of non-cost-specific benefits that arise from community solar. I recommend that you reflect a bit to ensure that you don't overemphasize the cost reductions and instead highlight the other advantages :)

3) Essay Structure: Organization and paragraphing

Beginning	Developing	Accomplished	Exemplary
Writing lacks logical organization. It shows some coherence but ideas lack unity.	Writing is coherent and logically organized. Some points remain misplaced and stray from the topic. Transitions evident but not used throughout essay.	Writing is coherent and logically organized with transitions used between ideas and paragraphs to create coherence. Overall unity of ideas is present.	Writing shows high degree of attention to logic and reasoning of points. Unity clearly leads the reader to the conclusion and stirs thought regarding the topic.

Essay structure target feedback:

Your draft is very logically organized. Each bullet point is nested and builds on your reasoning. Awesome job!

4) Research/Citation: Proper use of sources

	Beginning	Developing	Accomplished	Exemplary
Citations were not necessary for this submission.	Sources do not follow a documentation style (APA, MLA, Turabian, Chicago, etc.) and are not listed and/or work does not appear original because citations are not clear.	Sources meet the minimum requirements for documentation following standard practices of the field (APA, MLA, Turabian, Chicago, etc.). Work appears to be original but is not always cited properly.	Most sources are documented following standard practices of the field (APA, MLA, Turabian, Chicago, etc.). Work appears to be original and appropriately cited.	All sources are documented and formatted following standard practices of the field (APA, MLA, Turabian, Chicago, etc.). Work appears to be original and appropriately cited.

Research/Citation target feedback:

Citations didn't seem to be needed here :)

5) Grammar/Mechanics: Spelling, Grammar, Punctuation

Beginning	Developing	Accomplished	Exemplary
Errors in grammar and usage are very noticeable, frequent, and affect meaning. Lack of punctuation, or numerous errors in punctuation affect the readability of the text.	Problems with grammar and usage are not serious enough to distort the meaning but may not be correct or accurately applied all the time. Punctuation is random, and only the easiest rules show awareness of correct use.	Grammar and usage are good but do not always add to the style of the writing. Punctuation is somewhat accurate, and shows a good command for readability, but not creativity.	Grammar and usage are always correct and enhance the writing clarity and style. The punctuation is accurate, even creative, and guides the reader through the text easily.

Grammar/Mechanics target feedback:

Overall, your writing is incredible! You are clear, authoritative, and smart! If I were a policymaker, I'd love to support this idea! My one recommendation to you, besides a few small word choices, is to work on avoiding wordiness. It's very easy to write long and wordy sentences. It's much harder, yet more impactful, to develop short, punchy sentences that convey the same gravitas. For example, you say "Community solar projects contribute to significant reductions in electricity costs for participants." --> Do you see an opportunity to trim some words here? Writing is all about using effective, clear words. When writing, it's a good idea to look for strong, specific words. This makes your writing more effective and impactful. Sometimes, we use general, unnecessary words, which makes our writing feel more like a conversation or verbal communication. Writing is not the same as speaking - our audience, our tone, and our words must be different! Here are some ideas from the Purdue OWL's page on Concision to get you to think about being more concise, clear, and specific in your writing: - Replace vague words with powerful, specific words Example, "it would be a great idea to edit this essay for wordiness" vs "We should edit this essay for wordiness" - Interrogate every word in a sentence to make sure it's adding value - Combine sentences I really love this example from the Purdue OWL, so I'm going to share it here :D "Wordy: Many have made the wise observation that when a stone is in motion rolling down a hill or incline that that moving stone is

not as likely to be covered all over with the kind of thick green moss that grows on stationary unmoving things and becomes a nuisance and suggests that those things haven't moved in a long time and probably won't move any time soon. (67 words) Concise: A rolling stone gathers no moss. (6 words)"

Suggested revisions:

Thank you for sharing your work with me today! Again, great work! You gave me a lot to think about, so thank you :) Please feel free to resubmit if you have any additional questions. We are also available for live sessions if you would like to ask a tutor questions in real-time. As a quick reminder, here's what I suggest working on: 1. Revising thesis to avoid passive voice 2. Double-checking your cause and effects to ensure they each develop a unique theme 3. Reducing wordiness and increasing concision Thank you again for submitting! Great job, and good luck!
